

Discussion Points for AWG LCA

- 1) Scenarios (a lot of this is, unfortunately, vague)
 - a. AWG vs Bottled Water (or shipped water from Drinking water plant?)
 - b. Scale and Duration.
 - i. Most discussion focused on providing water while “fixing” contamination issues in the distribution systems
 1. schools
 2. Neighborhood/cities
 - ii. Shouldn’t be emergency response (IMO), since this is not EPA’s direct domain
 - c. Climate/seasonal impacts
- 2) Data sources
 - a. Very little published data (some reviews of temperature/RH effects)
 - b. WaterGen Corporation: NDA in place to share information on their system, could also collect energy usage data from testing on their system here in Cincinnati
